DETAILED ACTION

1. This is in response to the communications filed on 24 January 2007.
2. Claims 1, 2, 4-7, 9-12, 14 and 16-20 are pending in the application.
3. Claims 1, 2, 4-7, 9-12, 14 and 16-20 have been restricted.
4. Claims 3, 8, 13 and 15 have been cancelled.

Election/Restrictions

5. Restriction to one of the following inventions is required under 35 U.S.C. 121:
 - I. Claims 1, 2, 4-6, 11, 12, 14 and 16-20, drawn to an image server for outputting encrypted image data, classified in class 713, subclass 165.
 - II. Claims 7 and 9, drawn to a unique password determination, classified in class 713, subclass 183.

The inventions are distinct, each from the other because of the following reasons:

Inventions I and II are unrelated. Inventions are unrelated if it can be shown that they are not disclosed as capable of use together and they have different designs, modes of operation, and effects (MPEP § 802.01 and § 806.06). In the instant case, the different inventions invention I has separate utility such as an image server for outputting encrypted image data, classified in a *different Class/Subclass*. Invention II has separate utility such as a unique password determination, classified in a *different Class/Subclass*. See MPEP 806.05(d).

Art Unit: 2131

6. The inventions are distinct, each from the other, because of the following reasons:

(a) These inventions have acquired a separate status in the art as shown by their different classifications.

(b) The search required for each Group is different and not co-extensive for examination purposes.

For example, the searches for the two inventions would not be co-extensive because these Groups would require different searches on PTO's classification class and subclass as following:

The Group I search (claims 1, 2, 4-6, 11, 12, 14 and 16-20) would require use of search **class 713, subclass 165** (not require for the inventions II).

The Group II search (claims 7 and 9) would require use of search **class 713, subclass 183** (not require for the inventions I).

For the reasons given above restriction for examination purposes as indicated is proper.

7. Application is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).

Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48 (b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a petition under 37 CFR 1.48 (b) and by the fee required under 37 CFR 1.17 (h).
